

We Need Integers

Name _____

Circle the three activities you will be doing. Attach this paper to your completed activities.

<p>Write A Story that could be represented by this integral expression:</p> $20 + (-10) + (-4)$	<p>Use the word integer in a graphic organizer or mind map to show anything you know about integers.</p>	<p>Find examples of integers in the newspaper, a magazine or on the internet. Clip out the examples or print out the examples and glue them to a paper.</p>
<p>Use the letters in the word "integer" as stick figures in a cartoon, or make an artistic design using the word "integer" that shows the importance of integers in our world.</p>	<p>Make a list of 10 examples of numbers that are integers and 10 examples of numbers that are not integers</p>	<p>Explain to a parent or other family member why we need integers in our world and what might happen if there were no integers. Have them sign a note saying you did this.</p>
<p>Make up a cheer or a short dance routine to show our need for integers. Perform for the class.</p>	<p>If today were 0 on a time line, show some integers to represent important events in your life in the past and the future. Label the time line.</p>	<p>Make up a poem, a story or a rap about Mr. or Ms. Integer and how important they are in the world.</p>

Tic Tac Toe, choose any three in a row.

Date due is _____.

Score 10 points for each completed choice.

Score 5 points for having the choices neatly attached to this paper.

Total score /35
